transmission
by Tarzan.

Editorial:

Not satisfied with the U.K. carrying on trade with Nth. Vietnam, students from the Monash University in Melbourne are arranging a money raising campaign to aid our friends in the north. They reckon it's the only way to win the war!

Opinions may vary slightly when they face the call-up medical after they "flunk" at Uni.

Only the Rugged Survive

Last week during one of our routine showers an Arty Tac member was struck by lightning. Although for sometime after he looked and acted like a faulty neon sign, Dicko informed our resident Doctor/Psychiatrist, Roger McDonell (of building and construction fame) that this was but the climax of a perfect day.

Earlier, whilst helping on same building project he had nonchalantly hit himself on the head with a hammer. Some hours later, having experienced partial recovery and whilst on the move to "Her Majesty's" Theatre, NUI DAT, he found himself wading waist deep through somebodies freshly dug seven foot deep "JOHN".

Three bottles of Old Spice later he arrived at Arty Tac just in time for the thunderstorm ----- It's the War you know!

Somebody-down-there-doesn't-like-them.

There is absolutely no truth in the rumour that 31A has declared war.

An incident flared up several nights ago when Ross Gunnell and Nick Proskurin were fired upon from a very close but unknown source. Initially panic-stricken members however, were ready to carry out the sequel to the Alamo!

Authorities are hoping for a peaceful solution and compromising agreements may result in the issue of flack-jackets to 31A and "Daisy" air guns to 108 Fd Bty.

Comforts of home Dept.

During last weeks downpour LPI had to anchor themselves securely on NUI DAT for fear of ending up on Luscombe. Also, Alpha Pad was able to use it's newly acquired scuba gear.

Answer to last weeks puzzle.

Even though Merv Dart, Tom King and Barry Bonser have been gallantly tearing up Route 2, their efforts were in vain. The solution - it can't be done, for the driver exceeds the time factor whilst travelling the first mile, making it impossible for him to complete or even start the second mile. Nice try fellas, maybe now we'll gat the mail on time!

Who's Who
Arty Tac

The O.C., Capt. W.R. "Blueleader" Hamilton, is our everlovin' flower enthusiast. His ancestry dates back somewhere around the War of the Roses.

Sgt Trev Waghorn, is a naturalist at heart. His Crater Examination picnics are a must on everybodies social calander.

Bdr Barry "Rake" Bonser who though showing signs of strain, can't blame it on the transport office. It appears that all the extra liaison work with the RAAF is taking it's toll.

Al "Granpa" Adams, an Arty Int Sig should be getting his group 4 as a sign writer, but is quite content with his RTA in Sept. It's ironical that he's going home in the Orange Blossom Season.

Geoff Blackwell, the "rio" in the group, is an Arty Int Op from S.A. He is writing a book on "How to Win at Pontoon with a Small Capital". Obviously it's going to be a satire!

Paul "Pibs" Dickson works under the alias of "Cnr Bell". Believed to be in SVN to save money to pay his excess telephone bill. Rumour has it that his exuberance is due to "that cigarette" he smokes actually being a reefer.

Pete "Shot" Fletcher is "Blueleader's" ADC and is the official surfing advisor for the Task Force and is doing research work on making VUNG TAU the Mecca of the surfing world by trying to have next years World Championships held here.

Ernie "Old Dear" Newbold, an Arty Int Sig and Queen Scout, is requesting an extension of his tour here, as he is organising a BAKIA Boys Brigade.

This is going to be a continuing running-down of members in the Battery. Let us know what you think and we could be able to use your ideas

R & R Sequel.

A fellow still suffering from his adventures of the night before walked into his favourite hotel the next day. "Two asprins", he said to the bartender, "And don't slam the lid on the box!"

Teen Scene.

Requests for the "Mr. Whippy-of-the-air" from music lovers, may be made by contacting the US Avn Rep or U.S. Supreme Headquarters, Disneyland, USA.

Farewell

Bdr. Murray Poustie is reported to be making a steady recovery and is going home for further treatment. Our thoughts go with you Murray and all the best for a speedy and complete recovery.
